1 Yann Esposito

1.1 Resume

name	Yann Esposito
mail	yann.esposito@gmail.com
port	(+33)650845271
address	Bât 9, Résidence Saint Marc 591, avenue Jean Aicard 06700, Saint Laurent du Var

1.1.1 Professional Background

2016 →	Clojure Software Engineer for Cisco (Threatgrid), Remote
2013 → 2016	Machine Learning Scientist & Software Engineer at Vigiglobe, Sophia Antipolis, France
2010 →	Co-Founder of GridPocket, Sophia Antipolis, France
2007 → 2013	AirFrance, Sophia Antipolis, France
10/2006 → 3/2007	Post Ph.D., Hubert Curien Laboratory, St-Etienne, France
10/2004 → 9/2006	ATER (College Degree Teach & Research), Marseille, France
10/2001 → 9/2004	University Monitor (College Degree Teach & Research), Marseille, France
1995 → 2000	Miscellaneous summer jobs

1.1.2 Education

2004	CS Ph.D. in Machine Learning at Université de Provence
2001	D.E.A. (Equivalent to Master in Computer science)
2000	Maîtrise in Computer Science
1999	Licence in Computer Science
1998	DEUG MIAS (Math)
1995	BAC S (Math)

1.1.3 Research Activies: Publications

<i>International Journal</i>	[Fundamenta Informaticæ, 2008] [Pattern Recognition, 2004]
<i>Internation Conferences</i>	[ECML 2008] [ICGI 2006] [COLT 2006] [COLT 2004] [ICALP 2003] [ICGI 2002]
<i>National Journal</i>	[JEDAI 2002]
<i>National Conferences</i>	[CAp'06] [CAp'04] [CAp'03]

1.2 Presentation

I am French with a Post Ph.D in Machine Learning¹. Furthermore I love web programming and design.

I am currently working remotely for Cisco Security team as a Clojure Software Engineer.

Previously I worked for Vigiglobe. The first six months I worked with `node.js` (API/MongoDB/Web). Then we upgraded our stack to *Clojure*, *Haskell*, *Mesos*, *Kafka*, *Druid*, etc... At that time we were two to make all technical decisions. In the end we made a real time analytics of social media content on a scalable architecture. Actually our architecture is able to manage (Aggregation & Machine Learning) thousands of messages per second.² In particular, I've written an Haskell twitter stream absorber able to handle thousands of tweets per seconds. And I coded myself a real time sentiment analysis module taking algebraic properties into account to optimize its efficiency.

- During my Ph.D. I made a C++ program (github³ and resume⁴). I coded most of standard HMM learning algorithms. I developed an algorithm which I invented during my Ph.D. which use some operational optimization algorithm. During this period I published articles in international conferences and I taught Computer Science to college students.
- At the Hubert Curien Laboratory I made my post Ph.D. I developed a scientific application in Java/applet/JWS that should be used by biologists. The code has been updated a bit since my 6 month post Ph.D.⁵.
- I worked in the web industry for Airfrance. My work environment was quite heterogeneous. From shell scripting to manage huge amount of data, web design and production environment.
- I worked for GridPocket (I am a co-founder). This is a French startup specialized in Electric Grid. I created a private⁶ web application.
- I've also written an iOS application to manage passwords⁷.
- I am the author of some quite popular blog posts⁸.

For an almost exhaustive list of my projects, you could check my github account: github.com/yogsototh

¹To be more precise in Grammatical Inference

²<http://vigiglobe.com>

³<https://github.com/yogsototh/DEES>

⁴<http://yann.esposito.free.fr/dees.php?lang=en>

⁵<http://labh-curien.univ-st-etienne.fr/SEDiL/faq.php?lang=en> (I like to believe I became a better designer)

⁶Sorry the code is private I can't show it :(.

1.3 Public things done

- **Cisco (threatgrid)** Security & Threat Management.
- **Vigiglobe** architecture able to analyze thousands of social media messages in realtime. In particular, real time Machine Learning & Statistics.
- YPassword iOS application
- Gridpocket web services (from conception to realization, works in correlation with a mobile app)
- **DEES**: a 10.000 line C++ command line program. This program implement most **HMM** standard algorithms & inference algorithms.
- **SeDiL**: a Java application using Swing UI. The goal is to provide biologist an easy way to use an algorithm that generate Similarity Matrices for strings but also for Tree structures. Most graphics was done by me, including the drawing of trees. I didn't used a library for that purpose.
- For YPassword ; a Dashboard Widget, a web interface, a command line tool.
- Some websites: yannesposito.com, ypassword.esposito.com
- Written a thesis in Machine Learning and published in major international conferences: [ICALP 2003], [COLT 2004] & [COLT 2006].
- A full javascript web application which display Electric consumption in real time.
- **krambook** (the engine I use to create this document. I exported it in HTML, PDF (using \LaTeX) and SVG.
- some Mac OS X screensaver, a MetaPost plugin to draw Automata, an RFC-like document to help my student to make a TOR like network, etc...
- a bunch of other projects see <http://github.com/yogsototh>

2 Technical Competences

Languages: Haskell, Clojure, Javascript, scheme, C, camL, C++, Ruby, Perl, Java, Python, PHP

Web frontend: elm, Clojurescript, Reagent, Angular.js, sass, etc...

Web framework: compojure-api, Yesod (Haskell web framework), action-hero (node.js)

Programming environments: Mac OS X, Unix/Linux (Solaris, Ubuntu, Debian), Windows XP

Data Mining Tools: weka, SVMlight

Stream Computing: storm (with clojure)

Unix: Shell scripts (zsh, bash), awk, L^AT_EX, ConTeXt, metapost

Version Control Tools: git, Bazaar (DCVS), subversion (svn), CVS

Mac: Objective-C Cocoa (Mac & iOS), Dabsboard widget, Quartz Composer

3 Jobs

3.1 Clojure Software Engineer for Cisco 2016 →

- *Remote*

Product	Security Threat Management
Role	Clojure Software Engineer

3.2 Machine Learning Scientist & Software Engineer for Vigiglobe 2013 → 2016

- *Sophia Antipolis, France*

Product	Scalable Real Time Social Media Analytics Sentiment Analysis
Role	Many client side web applications (Angular.js & reagent) Machine Learning Scientist (fast sentiment analysis, learning protocols, etc..) Full stack engineer (backend to frontend architecture)
Keywords	Clojure, Haskell, node.js, reagent, Angular.js, Stream computing

3.3 Co-Founder & freelance for GridPocket 2010 →

Sophia Antipolis, France

Product	Two API server (one for client, another for administration) A private client side web application An iPhone Application Some Linux boxes to send data to the servers A Linux driver
Role	Full technical responsibilities
Keywords	Ruby, REST, JSON, HTML, CSS, Javascript, AJAX, jQuery, Objective-C, ASIHTTPRequest, CorePlot, CoreData, C

3.4 Consultant, AirFrance 2007 →

Sophia Antipolis, France

Role	In charge of the Airfrance CMS for their website.
Keywords	TeamSite, Perl, XML, XHTML, CSS, javascript, JSP, Unix (Solaris/Linux), Bazaar

3.5 Post Ph.D 10/2006 → 3/2007

Université Jean Monet, Laboratoire Hubert Curien, Saint-Etienne

Product	SeDiL
Role	Java Developer
Research	Similarity measure between strings or XML trees
Contact	Marc Sebban
Keywords	UML, Java 1.5, Swing, Java 2D, Java Web Start, Applet, subversion, XML, XHTML, PHP

Details:

Java application: *11 000 lines with javadoc*

Main functionalities

- learn edit matrices
- compute edit distances between trees or strings
- visualize trees or sequences (JAVA 2D)
- classification using K means
- Generate random tree couple from an edit distance matrice

Web: <http://labh-curien.univ-st-etienne.fr/SEDiL/>

3.6 ATER 10/2004 → 9/2006

Research & Teacher, Université de Provence, Marseille

teach 1/2, research 1/6, C++ development 1/3

DEES ; a C++ software

7500 lines of C++ code, 10.000 with comments

Main functionalities:

- Multiplicity Automata, HMM & PDA Inference,
- Baum Welch & Viterbi Algorithms,
- GraphViz export,
- String Generation from many Models,

Languages	C++
API	STL
Environment	Linux (Debian) & Windows XP

3.7 Moniteur des Universités 10/2001 → 9/2004

Université de Provence, Marseille

teach 1/3, research 1/3, C++ Development 1/3

Creation of DEES (see preceeding entry).

4 Diploma

2004 | Ph.D. degree in Machine Learning |
2001 | D.E.A. in Computer Science (equivalent to master) |
2000 | Maîtrise d'Informatique |
1999 | Licence in Computer Science |
1998 | DEUG MIAS (math) |
1995 | BAC S (math) |

5 Scientific Publications

5.1 International

Journals | [Fundamenta Inforamticæ vol.86 2008] [Pattern Recognition, 2004] |
Conferences | [ECML 2008] [COLT 2006] [ICGI 2006] [COLT 2004]
[ICALP 2003] [ICGI 2002] |
Workshop | [TAGI05] |

5.2 National (French)

Journals | [JEDAI, 2003] |
Conferences | [CAP 2006] [CAP 2004] [CAP 2003] |
Thesis | [Université de Provence 2004] |

6 Projects

Most of my latest programming activities are publicly available at github.com/yogsototh

6.1 YPassword 2008 →

Mainly an iOS application:

- YPassword, <http://ypassword.esposito.com>

I've done fully the website from scratch. Also there are some javascript implementation of YPassword method:

- a Mac OS X dashboard widget,
- a Cappuccino Web application,
- a jQuery Web application,
- a command line tool,
- an Applescript helper

6.2 Anonymous Network Project 02/2006 → 06/2006

Made a protocol similar to [TOR](#) for student.

6.3 Other projects

- Web Application used for private team usage at AirFrance 2008 →
This application is just done *for teh lulz*. Not related to the Airfrance work. But still pleasant.
Javascript(Prototype.js, Scriptaculous), CSS, PHP/MySQL, Google Talk
- [metapost package](#) to draw Automata 2003 → 2004
metapost
- Mac OS X Screensavers ([YClock](#) & YAquaBubbles) 2003 → 2004
Objective-C, Quartz Composer, Cocoa

You could find even more information by looking at:
